

JIG

features hardened steel drill guides to ensure precise and straight drilling. The Shelf Pin Jig has a dual position adjustable fence for custom hole placement, a locating pin for quick and accurate spacing reference and a 1/4-inch brad-point bit with depth collar. It has standard 32-millimeter hole spacing and 1/4-inch hole size (5-millimeter bit is available separately) and comes with a drill guide lifetime warranty.

SPUD SPIKES®

are 6-inch No. 316 food-grade stainless steel nails with the structure strength to pierce a potato. The Spud Spike conducts oven heat into a potato's center, thus reducing baking time, and doesn't leave dark marks in the food like aluminum nails could. They can also be inserted into sweet potatoes, apples, meat such as bratwurst and sausage and are ideal for camping and tailgating.
